SUMMARY

Full Stack Developer with experience building scalable web applications and AI-powered solutions using **MERN and FastAPI**. Focused on developing impactful products through clean architecture, system design, and building reliable, user-centric experiences.

EDUCATION

Jaypee Institute of Information Technology

Bachelor of Technology in Computer Science and Engineering (CGPA: 8.75)

Noida, India

2023 - Present

St. Paul's Academy

Senior Secondary (97%)

Ghaziabad, India

2022 - 2023

EXPERIENCE

BlackBytt | Software Developer Intern

April 2025 – July 2025

- Engineered **customized, branded storefronts on Shopify** using Liquid, HTML/CSS, and JavaScript, increasing user engagement by 30% and reducing customer support requests by 15%.
- Designed **interactive tutorial walkthroughs** blended into the Shopify storefront, reducing user-reported technical issues by 20% through guided onboarding tutorials and improving customer satisfaction score.

PROJECTS

FinSight AI | *React.js, Node.js, MongoDB, FastAPI, FAISS, HuggingFace, Groq LLM, OCR*

[GitHub](#) | [Live](#)

- Architected an end-to-end financial intelligence platform** that converts uploaded documents into structured risk insights using secure access control and context-aware querying for audit-sensitive workflows.
- Implemented a multi-stage RAG pipeline** combining OCR extraction, document parsing, FAISS vector search, and LLM reasoning to generate explainable fraud analysis reports.
- Developed a fraud detection and retrieval engine** trained on 10,000+ financial transactions (5% fraud rate), generating 28 fraud indicators and enabling top-5 contextual evidence retrieval.

MeshVault | *JavaScript, Node.js, React.js, WebRTC, WebSockets*

[GitHub](#) | [Live](#)

- Architected a **decentralized communication platform** using **WebRTC DataChannels** and WebSocket signaling, **designed for disaster-response environments** with intermittent or no internet connectivity.
- Orchestrated **device discovery and session continuity** using persistent identities, enabling **10+ concurrent nodes** across multiple signaling ports with **90%+ stable peer connections** during failure testing.
- Developed a resilient **store-and-forward delivery workflow** with chunked file transfers, enabling deferred delivery after reconnection and improving message and file delivery reliability by **40%** for payloads up to **20MB**.

WanderLust | *HTML, CSS, JavaScript, Node.js, Express.js, MongoDB, EJS*

[GitHub](#) | [Live](#)

- Constructed an **Airbnb-like web platform** featuring secure user authentication with **Passport.js**, structured using an **MVC architecture**; consistently maintained 95% session reliability during testing.
- Optimized **Cloudinary** integration for image storage and delivery, along with flash messaging to improve user interaction; improvements led to a 30% faster load time and increased maintainability by 40%.

TECHNICAL SKILLS

Languages: C++, Java, JavaScript, TypeScript, Python, SQL, C, HTML, CSS, PHP

Frontend: React.js, Tailwind CSS, Bootstrap, EJS

Backend: Node.js, Express.js, REST APIs, JWT Authentication, FastAPI, Passport.js, WebRTC, LangChain

Database: MongoDB, Mongoose, SQL, Redis

Tools & Platforms: Git, GitHub, Postman, Docker, VS Code, Cloudinary, Canva, NumPy, Pandas, Antigravity

ACHIEVEMENTS/CERTIFICATIONS

- Solved **600+ DSA problems** across LeetCode, Codeforces, and other platforms.
- Institute Finalist: Smart India Hackathon 2024
- Secured 2nd position for project "EmoTrack" in Spark'24 exhibition held by CICE, IIIT [Certificate](#)
- Completed Generative AI Study Jams 2023: Certificate issued by Google Developer Student Clubs, IIIT [Certificate](#)
